'Lloyd Needs' Social Needs Survey Launches

Lloydminster, AB/SK – Lloydminster Family and Community Support Services have partnered with the Lloydminster Regional Health Foundation on the 2017 Social Needs Assessment.

A Social Needs Assessment is a way for FCSS and the LHF to identify social needs and priorities within the community, evaluate existing programs and resources and make recommendations to address identified gaps in services.

“We are excited to engage the community,” said Patrick Lancaster, Manager, Social Programs and Services. “Lloydminster is a unique community with many needs; the Social Needs Assessment will create a shared understanding of the well-being of residents, and the social issues that impact life in Lloydminster.”

The Social Needs Survey takes approximately 7-10 minutes, it is made up of multiple choice, drop down, text and comment sections. All residents over the age of 17 are encouraged to complete this confidential survey. More info about the project can be found at lloydneeds.ca
