Bike Signals & Safety

TURN LEFT **TURN RIGHT** **STOP OR SLOW DOWN**

- 1. Go with the flow!**
Ride in the same direction as the rest of traffic. Be mindful of all surrounding vehicles and obey all traffic signals and laws.
- 2. Look, signal and look again!**
Signaling on bicycles is just as important as it is for vehicles.
- 3. Protect your head and wear a helmet.**
- 4. Stay visible!**
Drivers can only see you if you can see them. Use reflectors and lights when biking in low visibility and always wear bright colours.
- 5. Stay alert and always watch for hurdles and hazards.**
- 6. Don't get distracted.**
Listening to music and talking or texting on your phone can distract yourself from biking safely.

— Concrete/Asphalt Trail ● Building/Shelter Ⓟ Parking
- - - Gravel Trail 🎡 Playground
